

SCHOOL OF AVIATION

PROGRAM OUTCOMES

PROFESSIONAL COURSES		repair aircraft electronic systems with emphasis placed on communication, navigation and flight management systems.	installation/testing/replacing avionic systems components and line replaceable units (LRU).	an ability to indicate the information in aircraft electronics and system as well as appropriate with FAA (Federal Aviation Authority) regulation.	an ability to demonstrate knowledge about aviation industry such as; Current status, Segment and Opportunities.	an ability to demonstrate critical thinking in technical troubleshooting.	an ability to reach the standard requirements relating to the safety and airworthiness of the aircraft in part as appropriate.	knowledge of the privileges, responsibilities, and limitations applying to avionics technician certified to perform aircraft maintenance.	an ability to perform servicing, maintaining and repairing of avionics parts, components and systems, as well rotary and fixed wing, including their internal system and ground support equipment.
AVT 1101	Theory of Flight (Fixed and Rotary Wings)			Introduced	Introduced	Introduced	Introduced		
AVT 1102	Avionics Hand Tools and Equipments-LEC						Introduced	Introduced	Introduced
AVT 1102L	Avionics Hand Tools and Equipments-LAB						Introduced	Introduced	Introduced
AVT 1103	Aircraft Electricity (AC/DC)-LEC	Introduced	Introduced	Introduced		Introduced	Introduced	Introduced	Introduced
AVT 1103L	Aircraft Electricity (AC/DC)-LAB	Introduced	Introduced	Introduced		Introduced	Introduced	Introduced	Introduced
AVT 1104	Fundamental Wiring Techniques(Connectors,Crimping& Soldering)-LEC	Introduced	Introduced	Introduced		Introduced	Introduced	Introduced	Introduced
AVT 1104L	Fundamental Wiring Techniques(Connectors,Crimping& Soldering)-LAB	Introduced	Introduced	Introduced		Introduced	Introduced	Introduced	Introduced
AVT 1105	Radio Laws and Regulations			Introduced	Introduced				
AVT 1106	Engineering Drawing 1					Introduced
